

METHOD AND SYSTEM FOR GENERATING CHARACTERS**ABSTRACT OF THE DISCLOSURE**

The invention concerns a method (800) and system (100) for
5 generating characters on a display. The method (800) includes the steps of
assigning (812) at least one character (124) to one of a plurality of
predetermined values that correspond to varying levels of pressure and
receiving (816) an applied pressure. The method (800) can also include the
step of selecting (820) at least one character (124) in response to the applied
10 pressure in which the character (124) that is selected is assigned to the
predetermined value that corresponds to the applied pressure.
